

ELEVEN MILLION IN THE SOUTH FOR A PLANT

Georgia Enter the Competition Against Claims of Chattanooga

Somewhere in the south the federal government will locate an eleven million dollar armor plate plant, and the time for selecting the place is not far away.

Rome, Ga., has entered the competition, against Chattanooga, Tennessee. A Washington dispatch to the Atlanta Journal says:

"Congressman Gordon Lee and Seaborn Wright, spent Thursday morning in conference with Secretary of Navy Daniels and members of the armor plate board that has been appointed to recommend a site for the location of the \$11,000,000 armor plant. The purpose of the conference was more to inform the Georgians as to the controlling points with reference to the selection of a site than to urge the claims of Rome, though neither Lee nor Wright failed to improve the opportunity for furthering Rome's chances.

The controlling points to be considered by the boards are:

"1. Strategic location with respect to military defense.

"2. Proximity of raw materials, especially iron ore and coal.

"3. Transportation facilities.

"4. Water power.

"5. Sites with especial reference to power, transportation and accessibility of raw materials.

"The board informed the Georgians that before it begins its tour of inspection it will gather all available data on these essentials and thoroughly digest this information. This, it is believed will occupy the board for two or three weeks, maybe longer.

Messrs. Lee and Wright feel that Rome is particularly fortunate in being able to offer surpassing advantages with respect to each of the controlling points to be considered by the board."

The city of Chattanooga is working hard for the plant, and offers inducements which are highly attractive.

NEUTRALS DON'T STOP WARS

With One Exception, Modern Conflicts Have Been Fights to the Finish.

Just how much ice does a neutral cut with belligerents at war? Open your history and see.

Only one great war in recent times was ended by a neutral. No neutral ever ended one of Frederick the Great's conflicts.

The Napoleonic wars ran over a pe-

AVE. B LOCATION

Corner of First Street and Directly on Dixie Highway.

Three 25x65 foot lots, corner Avenue B and First street, can be bought for \$5,500. Splendid location for a combination apartment house and store rooms. Avenue B will soon become heaviest traffic street in the city. A short block from municipal deck. Values advancing.

Realty Securities Corporation

1114 Avenue C. Phone 1012

Ladies' and Gents' Panama and Bangkok Hats, bleached, renovated and finished to the latest styles.

NO ACIDS USED
We Manufacture our own Hats
Location: Opposite Miami Savings Bank.

Kodak Developing and Printing
8-Hour Service.

Elbre's Drug Store

REMOVAL NOTICE

I have moved my office from 13th and Avenue C to my new location, 1116 Avenue F, near Twelfth Street, where I am better prepared than ever to give all work prompt attention. NO JOB TOO LARGE OR TOO SMALL TO HAVE MY PROMPT AND INDIVIDUAL ATTENTION. SKILLED MECHANICS FURNISHED on a moment's notice. All work guaranteed. Plans furnished free.

City Physicians Explain Why They Prescribe Nuxated Iron

To Make Beautiful, Healthy Women and Strong, Vigorous Men

NOW BEING MADE BY OVER FIVE MILLION PEOPLE DAILY

QUICKLY TRANSFORMS THE FLAILY, FLESHLESS TISSUE AND PALID CHEEKS OF WEAK, ANEMIC AND DELICATE, NERVOUS, RUN-DOWN FOLKS 200 PER CENT IN TWO WEEKS' TIME

Extracts from some of the letters received are given below:

Dr. King, a New York physician and author says: "There can be no vigorous iron men without iron. Pallor means anemia. Anemia means iron deficiency. The skin of anemic men and women is pale. The flesh is flabby. The muscles lack tone, the brain fatigued and the memory fails and they often become weak, nervous, irritable, despondent and melancholy. When the iron goes from the blood of women, the roses go from their cheeks."

In the most common foods of America, the starches, sugars, table syrups, candies, polished rice, white bread, sofa crackers, biscuits, macaroni, spaghetti, tapioca, sago, farina, dehydrated corn-meal, no longer is iron to be found. Refining processes have removed the iron of Mother Earth from these impoverished foods, and silly methods of home cookery, by throwing down the waste-pipe the water in which our vegetables are cooked is responsible for another grave iron loss.

Therefore, if you wish to preserve your youthful vim and vigor to a ripe age, you must supply the iron deficiency in your food by using some form of organic iron just as you would use salt when your food has not enough salt.

Dr. C. C. King, a Boston physician who has studied widely in both this country and in prominent European Medical Institutions says: "As I have said a hundred times over, organic iron is the greatest of all strength builders. If you are a woman, you will be surprised to learn that the iron in your blood is only one-half as strong as the iron in the blood of men. Mother Nature has the iron in the coloring matter in the blood of her children, is also not that kind of iron. You must take iron in a form that can be easily absorbed and assimilated to do you any good, otherwise it will prove worse than useless. Many an athlete and practitioner has won his success simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the fray; and many a weaker has gone down in inglorious defeat simply for the lack of iron."

Dr. V. Von Unruh, Medical Director in Chief of the New York City Clinic said, "I have given Nuxated Iron a fair and prolonged

trial. I have been more than satisfied with its results and will continue its use."

Visiting Surgeon at St. Elizabeth's Hospital, New York City, said, "I have never before given out any medical information or advice for publication, as I ordinarily do not do it."

But in the case of Nuxated Iron, I feel I would be remiss in my duty not to mention it. I have taken it myself and given it to many patients

with most surprising and satisfactory results. And those who are quick to increase their strength, power and endurance will find it a most wonderfully effective remedy."

Dr. Joseph L. of the United States Public Health Service says, "Patients in an emaciated and devitalized state of health—those, for instance, convalescing from protracted fevers, those suffering from a long-standing case of anemia, those in an emaciated condition late, in some cases been doctoring for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acetate or tincture of iron simple. Mother Nature has the iron in the coloring matter in the blood of her children, is also not that kind of iron. You must take iron in a form that can be easily absorbed and assimilated to do you any good, otherwise it will prove worse than useless. Many an athlete and practitioner has won his success simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the fray; and many a weaker has gone down in inglorious defeat simply for the lack of iron."
